

Are You Ready?

The Covid-19 Pandemic has slowed business, traffic, and life all over our country. But soon the public will be re-discovering life outside of their homes with fresh eyes and a renewed focus on personal and environmental safety.

If you haven't made the switch to LED lighting yet, consider now the best time to improve your community's welfare and image while enhancing your bottom line. Here's an example of how it could work:

Type	250W MH	250W HPS	400W MH	400W HPS
Est. LED Replacement Wattage	140W	100W	200W	160W
Yearly Energy Savings (per fixture)	\$67	\$85	\$114	\$133
Maintenance Savings (per fixture)	\$80	\$80	\$80	\$80
Focus on Energy Incentives	\$25-\$50	\$25-\$50	\$50	\$50
ROI	2.5 yrs.	1.8 yrs.	2 yrs.	1.6 yrs.

*savings are based on \$0.10 kwh running at 12 hours a day / 7 days a week / 52 weeks per year

It's important to note that Lighting Design Solutions works directly with the **Wisconsin Department of Transportation (DOT)** to ensure compliance. We also provide:

- **Free no obligation consultation and quote including your personalized savings estimate**
- **Three competitive quotes for installation (or use your preferred installer)**
- **Processing of all rebate paperwork and tax incentives to make sure your savings are maximized**

Call us today at 888.357.7070. We'll take care of the rest so that you're ready to be seen in the best possible light.
